### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Election/Restrictions***

1. Newly submitted claims 9-13 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 9-13, drawn to a photomask set, classified in class 430, subclass 5.
- II. Claims 14-19, drawn to alignment methods, classified in class 430, subclass 22.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and of Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed could be utilized in a materially different process that does not require the alignment steps as set forth in the Group II invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Since applicant has received an action on the merits for the originally presented invention (previously claims 1-8, currently claims 14-19), this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 9-13 stand withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 1756

3. Claims 14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over either one of Hwang or Ando et al. in combination with one of ordinary skill in the art's ability.

The Examiner relies on the rejection of record as presented in paragraph number 4 of the previous Office Action. All comments have been considered in light of the new claims presented, however, they are not deemed to be persuasive. The Examiner points out that Hwang's teachings are not limited to claim 1 in the patent. Merely pointing out an alleged deficiency in claim 1 of the patent does not define the claims over the entire reference. See claim 4 for another teaching in the patent. Furthermore, there is nothing in the application's claims requiring the alignment marks and the patterns to be of different sizes or line widths. Since this is the case, a mask having uniform pattern and alignment mark feature sizes and line widths would be within the scope as claimed. Applicants' comments about Ando et al. are not understood as setting forth a difference between the claims of the application and the teachings of the patent. It is also pointed out that different "sizes" of the patterns does not necessarily mean they are of different line widths. This could pertain to the shape, or size, of the pattern as well.

### *Conclusion*

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

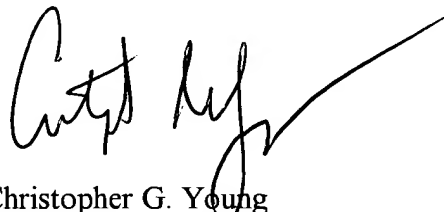

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
